eMPowerMillis Community Electricity Program

eMPowerMillis is pleased to announce its new pricing for Millis' Eversource electric customers. The new pricing begins with your December 2023 usage and remains the same through November 2025. If you are already on eMPowerMillis' default rate, you have already received a mailed notification and you do not have to respond to the mailing. You will automatically be included in the new rate, which is \$0.1617 per kWh

An important thing to note is that Eversource has just announced its new winter rates, which will be in effect from January 2024 through June 2024. Their new rate will be \$0.1725/kWh.

eMPowerMillis is a program offered by the Town to provide residents and businesses more electricity supply options by pooling the electricity use of thousands of users in Millis. eMPowerMillis does not replace Eversource as our electric utility: they continue to deliver electricity, repair outages and manage all billing. The program is a Town alternative for the Supply portion of your bill to Eversource's default supply and other third party electricity suppliers.

On the eMPowerMillis website eMPower.millisma.gov/enroll residents, business owners, and other ratepayers can:

- Learn how the program works;
- Use forms to enroll in the program, change their choice or leave the program;
- Read the aggregation plan and other program documents;
- See the benefits of supporting renewable energy generation.

Please keep in mind that future savings cannot be guaranteed because Eversource Basic Service rates

The municipality issued a press release with renewed program pricing as a method to notify residents and businesses of the upcoming program changes and their options to participate.
